

CITY OF MADISONVILLE, KENTUCKY
ENGINEERING DEPARTMENT
STORMWATER POLLUTION PREVENTION PLAN (SWPPP) CHECKLIST

Date: _____

Project Name: _____

Project Address/Location: _____

The purpose of this checklist is to give the minimum requirements needed to comply with Chapters 53, 54, and 160 of the City Code of Ordinances and to expedite the City's review and approval of a stormwater pollution prevention plan (SWPPP) which is required for construction activities covered under KYR10 General Permit for Stormwater Discharges Associated with Construction Activities. This document is intended to include all applicable city, state, and federal regulations; however, owners/developers are responsible for ensuring compliance with the most current city, state, and federal regulations.

Owner/Developer certification of compliance

Project name and location information (address or GPS LAT LON)

Site map including:

Drainage patterns (flow line arrows)

Contours or slope noted

Delineation and area contributing to each discharge point

Location of wetlands, surface waters in and around the site

Location where stormwater may discharge to surface water or MS4 with GPS (LAT LON decimal degrees)

Delineation of disturbed and non-disturbed areas

Total site area

Total area disturbed

Location of major structural and non-structural controls (including: dumpster, toilet, fuel point concrete washout area, silt fence, check dam, silt basin, etc. as applicable)

Location and type of final stabilization (pave, mulch and seed, rip-rap, etc.)

Project narrative

Construction sequence of major soil disturbing activities integrated with planned controls and permanent stabilization.

Detailed description of BMP controls (include all 3 points for each control).

- What stage of construction will it be implemented?
- Specifications for proper implementation
- Who (participant responsibility number) will complete task?

Include as applicable: silt fence, vegetative buffers, drainage swales, silt basins, retention ponds, culvert, diversion berm, check dams, concrete washout, dumpster management, fuel point management, chemical storage, litter, sanitary waste, construction entrance, fertilizer and pesticide application rates, spill prevention and response plan, portable toilet, etc.

Maintenance tasks and frequency for applicable BMP controls

Inspection of Best Management Practices (BMPs) who will be responsible frequency of inspection

Attach blank inspection form

Describe any non-stormwater discharge (de-watering, other ground water controls)

SWPPP participant implementation responsibility list (numbered and signed)

Signature: _____ Date: _____
